**Smart Maintenance**  
— Powered by Data

**TOWARDS SMART BUILDING MAINTENANCE**  
DAIKIN REMOTE MONITORING SYSTEM offers the smartest choice for building owners to monitor, predict and earn maximum savings.

## **DAIKIN** REMOTE MONITORING SYSTEM

**SMART DATA ANALYSIS**  
Continuously monitor efficiency of air-conditioning system with consistent observation and system malfunction analysis.

### **ENERGY MANAGEMENT**

Building owners can manage their energy consumption and earn more savings through improved equipment performance and reduced part failures.

### **PREDICTION**

Obtain up-to-date fault and prediction reports and alerts via SMS, email or mobile application. This allows users to organize maintenance plans effectively.

### **PROLONGED FUNCTIONALITY**

Consistent remote calibration and energy monitoring optimises the equipment's lifespan. And therefore reducing high replacement costs.

## **KEY BENEFITS**

**24 Hour Remote  
Monitoring System**

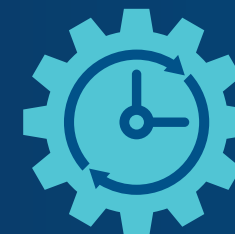

**Notification Of  
Malfunctions & Errors**

**Prediction Of  
Premature Part Failure**

**Prolonged  
Equipment Lifespan**

**Improvement Of  
Equipment's Performance**

**Facilitation Of  
Energy Planning**
